

## “Why is the world in continual motion?”

In science we are going to be learning about animals including humans exploring the digestive system. In addition we are going to learn about different states of matter.

In art next term, we will learn to explore and develop ideas, build and construct with a wide range of objects including using fabric to make a collage.

In our topic sessions we will look at the history and geography of fair trade focussing on where our food comes from.

During our PHSE sessions our focus will be on looking after our planet including looking at pollution, the use of pesticides and the impact of humans on the world we live in.

This term we will take advantage of the last of the sun to enhance our curriculum by providing the children with opportunities to grow their own fresh vegetables in our very own vegetable patch.

In our computing lessons, we are investigating computer science including using logical reasoning to explain how some simple algorithms work as well as using search technologies

Throughout our design and technology lessons we will be exploring food ingredients including how they can be fresh, precooked or processed.
